Psychosocial Theory Lifespan Development

Erikson divided the life span into eight stages. In each stage, we have a major psychosocial task to accomplish or crisis to overcome. Erikson believed that our personality continues to take shape throughout our life span as we face these challenges in living. We will discuss each of these stages in length as we explore each period of the life span, but here is a brief overview:

Erikson's stages of psychosocial development Wikipedia

Erikson's stage theory characterizes an individual advancing through the eight life stages as a function of negotiating his or her biological and sociocultural forces. Each stage is characterized by a psychosocial crisis of these two conflicting forces. If an individual does indeed successfully reconcile these forces (favoring the first mentioned attribute in the crisis), he or she emerges
